4. First Aid Measures	
General advice	: Never give anything by mouth to an unconscious person. When
	symptoms persist or in all cases of doubt seek medical advice.
Inhalation	: If inhaled, remove to fresh air. If breathing is difficult, give oxygen.
	If breathing is irregular or stopped, administer artificial respiration.
	Get medical attention.
Eye Contact	: In case of eye contact, remove contact lens and rinse immediately
	with plenty of water, also under the eyelids, for at least 15 minutes.
	Get medical advice/ attention.
Skin Contact	: In case of contact, immediately flush skin with plenty of water for at
	least 15 minutes while removing contaminated clothing and shoes.
	Get medical attention if irritation develops and persists. Wash
	contaminated clothing before re-use.
Ingestion	: If swallowed, call a poison control center or doctor immediately.
	Rinse mouth with water. DO NOT induce vomiting unless directed
	to do so by a physician or poison control center.
Most important	: No applicable data available.

and delayed	
Protection of first-aiders	: No applicable data available.
Notes to physician	: No specific intervention is indicated. Treat symptomatically.

#### 5. Fire Fighting Measures

Flammable Properties	: Flash point :>93.3°C
Extinguishing Media	: Use extinguishing measures that are appropriate to local
	circumstances and the surrounding environment. Water spray, Dry
	chemical, Carbon dioxide (CO2)
Unsuitable Extinguishing	: No applicable data available.
Media	
Special Hazards	: Hazardous decomposition products formed under fire conditions.
	(see also section 10) Avoid breathing decomposition products.

Special protective	: Exposure to decomposition products may be a hazard to health.
equipment for firefighters	Wear self-contained breathing apparatus for firefighting if
	necessary.
Further information	: Evacuate personnel to safe areas. Stop spill/release if it can be done
	with minimal risk. Do not allow run-off from fire fighting to enter
	drains or water courses.

#### 6. Accidental Release Measures

NOTE: Review FIRE FIGHTING MEASURES and HANDLING (PERSONNEL) sections before proceeding with clean-up. Use appropriate PERSONAL PROTECTIVE EQUIPMENT during clean-up.

cicali up:	
Safeguards (Personnel)	Avoid contact with skin, eyes and clothing. Ensure adequate
	ventilation. Wear suitable protective equipment.
Environmental	: Prevent further leakage or spillage if safe to do so. Prevent product
precautions	from entering drains. Clean contaminated floors and objects
	thoroughly while observing environmental regulations.
Spill Cleanup	Contain spill. Soak up with inert absorbent material. Collect and
	contain contaminated absorbent and dike material for disposal.
	Keep in suitable, closed containers for disposal. Ventilate the area.
	Clean contaminated floors and objects thoroughly while observing
	environmental regulations.
Accidental Release	: Dispose of in accordance with local regulations.
Measures	

#### 7. Handling and Storage

Handling (Personnel)	Avoid inhalation, ingestion and contact with skin and eyes. Do not
	use in areas without adequate ventilation. For personal protection
	see section "Exposure controls/personal protection"
	Handle in accordance with good industrial hygiene and safety
	practice. Keep container closed. Keep away from food and drink.
	Wash hands before eating, drinking, or smoking. Remove
	contaminated clothing and protective equipment before entering
	eating areas. Wash contaminated clothing before re-use.

**Engineering Controls** 

: Ensure adequate ventilation. Maintain air concentrations below occupational exposure standards. General mechanical ventilation is normally adequate but use local exhaust where necessary to maintain exposures below acceptable limits.

Individual Protection Measures, such as Personal Protective Equipment

:

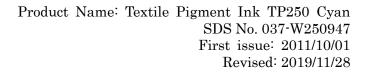

Respiratory Protection : No personal respiratory protective equipment normally required. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Consult the respirator manufacturer to determine the appropriate type of Respirator equipment for a given application. Observe respirator use limitations

specified by the manufacturer.

: Material: Impervious gloves

Additional protection: Gloves must be inspected prior to use., Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough., The choice of an appropriate glove does not only depend on its material but also on other quality features and is different from one producer to the other., The exact break through time can be obtained from the protective glove producer and this has to be observed., Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time.
